TRNA...ANOTHER VIEW

The tRNA molecule on the left (which forms an "L" when it unfolds after checking itself) can also be depicted as above by positioning the "linked vibrations that have identical totals" in common, concentric circles. When the extra vibrations disconnect, the tRNA molecule in the shaded area emerges. This structure reveals the latest scientific modeling of the tRNA molecule...There is a structure behind the chaos!!!

Notice, all linked vibrations in the same circles...have identical totals; and also notice, the commonality of their notes, e.g., in the circle 3104, the paired vibrations that have this total are all a "la-fa" linkage!
