

Chapter 7 - Enneagram with Numbers

- (01) **Evaluating** a denying force...
- (02) **creates** a *function* to change its course. The function cycles
- (03) **experience** grows...building up
- (04) **confidence** until the man knows that his
- (05) **skills** being honed by all past attempts now qualify him for the current events. And how, after
- (06) **actions** he made in the past, he
- (07) **invented** new tools to lighten the task. He knows he can do it; the
- (08) **decision** is made; he assembles the workers; it's time to engage. He does have the
- (09) **means**;
- (10) **anticipating** he sees...the way to transform it irrevocably. Just knowing it's
- (11) **feasible** lets him
- (12) **prepare**...all the right data for getting him there. Once it's
- (13) **envisioned**, he will
- (14) **commence**...the Harnel-Aoot with great (04) **confidence**. And after his (06) **action**...
- (01) **re-evaluate**. To see if indeed *it* ought to (02) **create**.
